DETAILED ACTION

Reissue Application

Applicants' Amendment to 09/590,584 has been reviewed and remarks considered. The specification and drawings are amended. Claims 4-6, 10, 12, 13, 14 are amended. Claims 35-40 are added. Claims 1-40 are pending.

1. New grounds of rejection necessitate this second non-final action on the merits.

Drawings

2. Applicants' replacement drawing sheets for Figures 1-4 filed 24 March 2004 are approved.

Specification

Incorporation By Reference

3. The attempt to incorporate subject matter into this application by reference to Behavioral Synthesis Methodology for HDL-Based Specification and Validation by D. Knapp et al., and Scheduling using Behavioral Templates by T. Ly et al. is improper for the following reasons: 1) Applicants attempt to incorporate by reference publications with publication dates that are later (June 12-16, 1995) than the filing date of the original application (May 12, 1995) 2) Further, even if the incorporation of the publications were proper, Applicants would not be entitled to amend the specification to include the texts of the entire publication. Applicant is only entitled to that portion of the publication that contains the subject matter specifically referenced in the application. In the instant case, for the D. Knapp et al. publication, the subject matter would be scheduling modes that allow a greater degree of freedom in assigning states in a

Art Unit: 2825

schedule; for the D. Gajski et al. publication, the subject matter would be control data flow graphs. Reference MPEP §608.01(p), I. Incorporation By Reference.

4. The amendment filed 24 March 2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The Appendices and the new drawings.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 251

5. Claims 35-40 are rejected under 35 U.S.C. 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows:

Applicants' specification, without the improperly incorporated appendices does not include support for the term "clock statement".

Claim Rejections - 35 USC § 112

6. The following is a quotation of the **first** paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 35-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

which it pertains, or with which it is most nearly connected, to make and/or use the invention. The term **clock statement** is not enabled by Applicants' specification.

8. The following is a quotation of the **second** paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 4, 5, 25, 26, 29, 30, 33 and 34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regard as the invention. Pursuant to claims 4 and 5, it is well known in the art of integrated circuit design that wait statements and Verilog @posedge/@negedge statements are different and use different code terms. Applicants' specification recognizes and includes this distinction (see e.g. page 25, line 1-5). Therefore, Applicants' confuses the claim language by reciting that wait statements use Verilog @positive edge or @negative edge statements, when it is well known in the art of integrated circuit design that wait statements explicitly use "Wait" as the keyword term. Similarly confusing are claims 25, 26, 29, 30, 33, and 34 which recite that "wait statements are clock statements (i.e. @posedge). Examiner suggests using the phrase "**transition(s) on**" instead of "use" or "are" to precisely and accurately claim Applicants' invention.
